Abstract

The article explains the ability to foresee (or see in advance) as a quantum jump to the future of the Quantum Computer in the Subconscious, which (being Quantum) works with the waves of the nonlinear electromagnetic field (NEMF) seen as aura, which turn out to be our emotional Spirit. If not everybody can foresee, it is because not everybody has access to the powerful Quantum Computer. It is deliberately done so, because it is not a wise thing to give to everybody access to such power. Only highly spiritual people, who meet some moral criteria, with high frequency (400 – 800 Hz) of their aura (Spirit) are allowed to access the powerful Quantum Computer, and use its treasures. One of these treasures is the ability to foresee. The majority of people with frequency of their aura (Spirit) 200 Hz, who do not have access to the powerful Quantum Computer, and have never experienced it, deny that ability to foresee exists.

Key words: *foresee; see in advance; quantum jump of quantum computer; quantum computer operates with NEMF; limited access to quantum computer; only high frequencies NEMF have access.*

Introduction

The Ability to Foresee (See in Advance)

I was a sophomore student and I borrowed a book from a friend of my friend to read for the exam. After the exam I had to go to the place where this person lived and return the book. Traveling to his place (I had the address but I have never been there), I saw like in a video where he lives. I saw the house, his apartment on the first floor on the left. I saw myself ringing the bell, he is opening the door hesitating for a moment (to invite me in or not) and I knew why he hesitated – there was a girl in his room. He invites me to follow him. I am entering his room, seeing the window on the right – his desk at the window, his bed on the left and a girl sitting on his bed [1].

When I arrived at the address, the house was the same as the one I saw in the video in my head. His apartment was on the first floor on the left, where I saw it on the video. I rang the bell, he opened the door, hesitated to invite me to his room or just take the book. Finally, he decided to invite me and motion to me to follow him. I entered his room, his desk was at the window on the right, where I saw it in advance, and on the left the same girl was sitting on his bed at the place I saw her in advance. I wanted to pinch myself to see that I am real and all that I saw in the video in my head is really happening [1].

I was very disturbed by this detailed vision in advance, and my disturbed conscious mind was telling me that it was not logical to know in advance what would happen. The University was teaching us that things like these shouldn't be happening because they were a violation of the causality principle, but they were happening. And advanced visions like this one happened more than once in my life. I was walking uphill to the Physics Faculty, for announced consultation with the Assistant Professor before the exam, when I saw like in a video running in my head the consultation in action. I have never been in his office before. I saw in the video in my head where his office was. I knocked at the door, and at his "Yes" answer I entered his office. His desk was on the left [1].

In my vision, when I asked the Assistant Professor my question, he was very disturbed and said that he remembered having trouble with this same question when he was a student, but he didn't remember how he solved the problem. He was so disturbed that he pulled a handkerchief from his pocket to wipe the sweat from his forehead (and it was winter time). I arrived at the faculty and saw one of my colleagues coming down the stairs. He said: "You came for the consultation? He is not in his office." Based on what I saw in the video running in my head, I said: "Probably he stepped out for a short time. Come with me let's check once more" [1].

The office was where I saw it in the video running in my head. I knocked on the door. At his answer "Yes" I entered his office. His desk was on the left where I saw it in my vision. I asked him my troublesome question. He was very disturbed and said that he remembered having trouble with this same question

when he was a student, but he didn't remember how he solved the problem. He was so disturbed that he pulled a handkerchief from his pocket to wipe the sweat from his forehead and it was not hot at all. Everything I saw in advance on the video in my head repeated with pedantic accuracy [1].

I was very disturbed again by this detailed vision in advance because the University was teaching us that things like these shouldn't be happening. I was not supposed to know in advance what would happen – this was in violation of the causality principle. Our science was saying that it was impossible to foresee events, but I was seeing in advance what would happen. I was foreseeing the near future, but I couldn't see that in the far future I would become a scientist, would be intuitively driven to do research in this area, and as a result I would be able to understand and explain scientifically how foreseeing and others unexplained phenomena are done [2].

Studies of the Foreseeing in Russia

I was a last-year post-graduate student in St. Petersburg, Russia, when on the seminar of our Department of Theoretical Physics Dr. Vassilev introduced us to the studies done in their Lab on people with ability to foresee events. However, I must say they were very far from understanding how this was done. But when after the lecture I told Dr. Vassilev that I am one of these foreseeing people, he insisted that I needed to go to their Lab to be studied. When I told him that I didn't have time for it because I was trying to sum up my results and finish writing the thesis. He was very frustrated and said: "It is so difficult to find people who can see in advance with their Mind, and when we find them, they don't have the time to come to our Lab to be studied."

My Studies of the Aura

Our science cannot explain the phenomenon seeing in advance because our science chose to believe that we are only material body. However, I was instinctively drawn to study the aura. I started with photographing the aura in high frequency electric field, which multiply the photons of the weak aura and makes its photographing possible (it is called Kirlian photography). I noticed that the aura is brighter when we experience positive emotions and dimmer when we experience negative emotions.

The Russian scientist Shkatov [3] invented and patented equipment, which allows him to measure the spinning of the aura. He found with his equipment that at positive emotions our aura spins clockwise, while at negative emotions the aura spins counterclockwise. Nonlinear physics teaches that vortices spin clockwise and suck energy in. This explains why positive emotions make the aura brighter – they make the aura spin clockwise and suck energy in. Nonlinear physics teaches that anti-vortices spin counterclockwise and emit energy. This explains why negative emotions make the aura dimmer - they make the aura spin counterclockwise and loose energy.

To be able to measure in numbers how much brighter the aura becomes at positive emotions or dimmer at negative emotions, I had to create and patent a very sensitive equipment allowing me to measure the weak aura, which is electromagnetic field 1,000 times weaker than the field created by the biocurrents of the material body [4]. This sensitive equipment allowed me to measure the weak field of the aura and its alternating vortices and anti-vortices, which made it obvious that the aura is nonlinear electromagnetic field (NEMF).

If at positive emotions the clockwise spinning aura's NEMF becomes brighter because it sucks NEMF energy in, there must be reservoir of NEMF energy available out there [5]. I call this reservoir of NEMF energy Space Matrix because this is the energy from which the Universe was created [6]. Since nonlinear fields do not dissipate, first a sphere of this not dissipating NEMF was created. I call it Space Matrix because from it the Universe was created. Since nonlinear fields can imprint information, the Creator imprinted on the Space Matrix NEMF the information about the Universe he wanted to create, and the Universe was created.

The Aura Is Our Spirit

Since at positive emotions when our aura's NEMF spins clockwise and sucks NEMF energy from the Space Matrix NEMF we say we are in high Spirit, and at negative emotions when our aura's NEMF spins counterclockwise and emits NEMF energy to the Space Matrix NEMF we say we are in low Spirit, our aura must be our Spirit. After I made this conclusion, I found that the ancient Jewish Cabala was teaching to high priest thousands of years ago that the aura is our Spirit. This makes us a material body and Spirit, which we see as aura [7].

With the Waves of the Spirit a Quantum Computer Operates in the Subconscious

I found through measurements with my supersensitive equipment that our aura (Spirit) is emotional [8] and if so, the Spirit is the one that makes us emotional and creative – without the Spirit we would be very primitive creatures (the material body is incapable of experience emotions). Since the Emotional Brain called Limbic System is in the Subconscious, obviously, to give us freedom of choice, the Creator put everything related to the emotional Spirit in the Subconscious. In the Subconscious with the waves of the Spirit operates a Quantum Computer, which is much more sophisticated than our Conscious Computer. How do I know this?

Hypnotists, who put the Conscious to sleep to access the Subconscious, found with surprise that hypnotized people with sleeping Conscious calculate many thousands of times faster. This means that in the Subconscious we have more sophisticated computer than our Conscious Computer, but being in the Subconscious we don't have conscious awareness of its existence. Since everything related to the

Spirit is in the Subconscious, and the Spirit is NEMF, obviously the sophisticated computer in the Subconscious operates with the waves of our Spirit NEMF and if so, it must be a Quantum Computer.

The Foreseeing with the Mind Is a Quantum Jump Ahead of Time of the Quantum Computer in Our Subconscious

Now, when we know that we have a Quantum Computer in the Subconscious (without having conscious awareness of its existence), we can explain the ability of some people to foresee events, which is a quantum jump to the future of the Quantum Computer. We can also explain why only a few people have this ability. It is because the access to the powerful Quantum Computer in the Subconscious is limited – access to the powerful Quantum Computer have only spiritual people with high frequency of their aura (Spirit) NEMF, who meet some moral criteria.

Dr. Valerie Hunt found that the people, who can foresee the future and see the past [9], have auras with frequency 400 to 800 Hz - these are the people who have access to the powerful Quantum Computer in their Subconscious. These foreseeing people are old Spirits, who by loving, forgiving, and helping others have reached higher spiritual level with high-frequency of their aura (Spirit) NEMF. However, 90% of the people on Earth are young Spirits with frequency of their aura (Spirit) 200 Hz. These young Spirits do not have access to their powerful Quantum Computer, and have never experienced foreseeing the future. They are the people who deny the existence of ability to foresee the future or see the past.

The Creator wisely limited the access to the powerful Quantum Computer because in the hands of bad people the powerful Quantum Computer can do a lot of harm. If we are wise, we would do the same – restrict the access to the powerful Quantum Computers, which we are trying to create.

Conclusion

In conclusion, foreseeing or seeing in advance is done through the Quantum Computer in the Subconscious, which allows quantum jumps to the future. If so, it does not obey the causality principle. In my article [10], I underlined that in the four-dimensional representation of Minkovski, two cones are the so-called “Real World” (the material world) in which nothing can travel with a speed higher than the speed of light and the causality principle is strictly followed. However, there are two more cones, called “Elsewhere”, where speeds higher than the speed of light are allowed and the causality principle does not apply. These are the cones of our Subconscious, where our Quantum Computer operates with the waves of our aura (Spirit) NEMF.

Everything material is a material body and NEMF [11]). The fact that every elementary particle has its own NEMF [11] automatically explains the dualism wave - particle. It also explains the fact that two coupled electrons (with total spin 0) remained instantaneously connected when one of them was taken to London and the other to New York. This means that: 1/ the particles' NEMF communicate through the media NEMF of the Space Matrix and 2/ their instantaneous connection means that it is done with a speed higher than the speed of light. This is what Einstein called "spooky action at a distance" [12] because his relativistic theories were built on the postulate that: 1/ nothing can travel with a speed higher than the speed of light (which is true for all material particles, but not for their NEMF). Also, basic postulate of the Einstein relativistic theories was that there is no ether (Space Matrix NEMF), and if this were true instantaneous connection between two coupled particles would be impossible.

This instantaneous connection between coupled particles at large distance proves that there is media (Space Matrix NEMF) between their NEMFs, which allows them to stay connected. The instantaneous (very high speed) connection between the particles means that it is done with a speed higher than the speed of light. The speed of light is the limit for the material particles, but it does not apply to their wave NEMF part, which can connect with a speed higher than the speed of light. This fact also explains the higher rate of computation of the Quantum Computer in our Subconscious, which operates with the waves of the aura (Spirit) NEMF, which allows calculations with a very high speed and allows us to foresee the future, which is nothing else but a quantum jump ahead of time of the Quantum Computer.

Amazingly, Nicola Tesla (1856 – 1943) spoke about "radiation energy" propagating with a speed higher than the speed of light and "passing through the Faraday case". This "radiation energy" is the energy of our aura (Spirit). Being nonlinear electromagnetic field (NEMF), our aura (Spirit) can pass through a screen, a wall, a door, or Faraday case. When Jesus' Spirit left his body after his death (called resurrection), he was able to join his disciples regardless that the door of their meeting room was locked (for security purposes). This is because the Spirit NEMF can pass through a locked door. If everything material is a material body and NEMF [11], in all living beings the body NEMF is magnetically attached to the Spirit NEMF, which means they spin in opposite directions. Death is separation of these 2 NEMFs, which takes 3 days and 3 nights [13].
